Pain and Distress: Psychodynamic Aspects and Collaborative Models of Care

The American Academy of Psychodynamic Psychiatry and Psychoanalysis

62nd Annual Meeting

May 3 - May 5, 2018

SHERATON NEW YORK TIMES SQUARE HOTEL
811 7th Avenue 53rd Street
New York, New York 10019

A Forum for Psychoanalysis and Dynamic Psychiatry

Registration is open to all mental health professionals and behavioral/social scientists.
Officers

President: Jennifer I. Downey, MD
President-Elect: Gerald P. Perman, MD
Secretary: Scott C. Schwartz, MD
Treasurer: Abby I. Altman, MD

Trustees
Luis Angel Garza, MD
Angela M. Hegarty, MB BCh
Debra A. Katz, MD
Alicia D. McGill, MD
David L. Mintz, MD

The Academy is where psychodynamic psychiatrists and physician psychoanalysts: discover a forum for exchange of ideas; find a voice within the American Psychiatric Association (APA) to advocate for psychodynamic understanding in the evaluation and treatment of patients; take a leadership role in promoting the importance of psychodynamic training in residency and medical education.

The American Academy of Psychodynamic Psychiatry and Psychoanalysis (AAPDP) is an affiliate organization of the World Psychiatric Association (WPA) and the American Psychiatric Association (APA).
Pain and Distress: Psychodynamic Aspects and Collaborative Models of Care

May 3- May 5, 2018
Sheraton New York Times Square Hotel
811 7th Avenue 53rd Street
New York, New York 10019

Program Co-Chairs:
Xavier Jiménez MD
César A. Alfonso MD

Chair of the Scientific Program Committee:
Joanna E. Chambers, MD

CME Committee Chair:
Silvia W. Olarte, MD

Message from the Program Co-Chairs: With this Annual Meeting Program our aim is to bring psychodynamic psychiatrists together to discuss the clinical challenges encountered when attending to patients with chronic pain and complex co-morbid medical conditions that cause psychological distress and affect quality of life. As complex multimorbidities often are best approached through collaborative models of care, we will present examples of successful therapeutic interventions when caring for patients who experience chronic pain and distress.

Patients seek help and healing when they experience pain and suffering. As physicians we are tasked with assessing, treating, and alleviating symptoms, and yet the predominantly medical model we work within often focuses solely on biophysiological drivers and solutions. However, many will feel only partially attended by this approach, and refractory pain and distress often persist when inadequately addressed by the biomedical model. We are faced with a strained, ineffective, costly, and at times dangerous medical system, resulting in isolation, alienation and disability. Providers are also suffering from burnout and disillusionment while practicing rigidly and defensively. When a dissatisfied, afraid, fixated, or overwhelmed patient with persistent symptoms is in our care, we must explore deeper psychodynamic forces causing, fueling, or maintaining pain and distress. And when strained physicians, colleagues, and trainees are distressed by our care options, we similarly must consider dynamic approaches and creative solutions.

The questions generated by these dilemmas are many: What is a given patient’s core or underlying pain? Does physical pain (or any other “medical” symptom) often or always represent something else? What intolerable experience is informing the preferable yet painful current presentation? And how do these surface manifestations change over the lifespan? Beyond physical pain, what is there to be done about the pain of loss, shame, rejection, isolation, disability, and helplessness? And what function does distress serve? In such distress, what is being communicated, in what manner, in what context, and for what reasons? We may argue that the human experience - behaviorally, attitudinally, cognitively, emotionally - all arises as a tangled reaction and consequence to primordial pains as well as accompanying distress. Cultural idioms of distress vary widely and must be understood in a sensitive and sensible way. Interoceptive awareness modulates the perception of nociceptive and neuropathic stimuli, and mentalization and the dynamics of self-other boundaries are important to understand experiences of pain and distress.

This year we examine the role of psychodynamic psychiatry in elucidating and alleviating the many protean presentations of both pain and distress, not only in our patients but also in ourselves as healers. Psychodynamic psychiatrists may be equipped to lead collaborative care models and liaise with other physician specialists to properly care for patients with complex multimorbidities.

Program: Our program will explore how psychodynamic psychiatry can be helpful with pain and distress of many types and presentations. We will discuss psychodynamic drivers of chronic unrelenting pain or other medical/physical symptoms, latent forces behind psychological distress, defenses and coping behaviors related to pain and distress, personality organization and how it informs pain and distress, transference and countertransference reactions emerging from work with pain and distress, and implications for training and supervision. We will also have presentations describing col-
laborative models of mental health care that are psychodynamically informed and could be practically implemented to better serve patients with complex multimorbidities, chronic pain and distress. Our opening night speakers will include introductory remarks by Joanna Chambers, AAPDPP Chair of Scientific Programs, and Jennifer Downey, AAPDPP President, who will describe the strategic position of psychodynamic psychiatrists in the care of patients with complex multimorbidities; Helen Herman, president of the World Psychiatric Association, who will describe how psychiatrists can catalyze change in global mental health; and Altha Stewart, president-elect of the APA, who will speak about the impact of childhood trauma on global mental health. The program will include over 90 speakers form the USA and 12 other countries in a rich academic exchange of clinically relevant presentations in the form of interactive workshops, paper sessions, and symposia. These will include two panels from the Consultation and Liaison Service at Columbia University on biopsychosocially integrated care, developmental neuropsychoaanalysis research and treatment of somatic symptom disorders. From the Cleveland Clinic we have presenters addressing the psychodynamics of chronic pain in relationship to trauma, from object relations and attachment theory perspectives, including group therapy dynamics. International speakers from Europe, South America, and Asia, from the World Psychiatric Association and the World Association of Dynamic Psychiatry, will present on the place of psychodynamics in psychiatry in institutional and trans-cultural contexts when caring for patients with complex illnesses. There will be workshops and panels addressing management of countertransference and specific sessions on the care of children and adolescents, families, and collaborative care models for patients with substance use disorders, mood disorders, chronic pain and somatoform symptom disorders. Workshops on psychodynamics and psychopharmacology, legal challenges to ethical care, trauma focused hypnosis, applied psychoanalysis, the care of patients with delirium, and psychotherapy with persons with Crohn’s Disease will give participants opportunity for small group discussions.

There will be an open forum and Q&A Session with twelve AAPDPP Past Presidents who will share historical perspectives and expert opinions about the evolution and essential areas of psychodynamic psychiatry. Other notable speakers will include Mary Ann Cohen, who will deliver a plenary address on creating health care environments for patients, physicians and their communities, and Mark Sullivan, the Keynote Speaker, who will address “Between suffering and survival: understanding the dynamic links among physical pain, social pain and addiction”. Our President Jennifer Downey will deliver a lecture: “A Tale of Two Societies, the Academy and the College: What Next?”

The American Academy of Psychodynamic Psychiatry and Psychoanalysis is an affiliate organization of the American Psychiatric Association and World Psychiatric Association.

Conference Learning Objectives: This meeting has been designed to meet the following professional practice gaps and the needs derived from those gaps:

Gap #1: Improving treatment of patients by:
A. Attaining sufficient knowledge of psychodynamic principles and the ability to apply this knowledge
B. Enhancing the ability to integrate dynamic principles, psychopharmacology, and neuroscience in clinical practice.

Needs derived from the gaps above:
A. To learn about development of therapeutic alliances; transference and countertransference; the handling of challenging situations; and practical applications of psychoanalytic theories.
B. To learn about complex pathologies, neuroscientific advances, pharmacological treatments, and medical conditions and their implications/ ramifications for psychodynamic psychotherapy.

Gap #2: Enhancing training of residents and early career psychiatrists.

Needs derived from this gap:
A. To learn new ways of engaging residents and training them in the complex theories and techniques of psychodynamic psychotherapy.
B. To foster learning of complex theories and techniques of psychodynamic psychotherapy by early career psychiatrists.

All presentations must address at least one of the specified needs.

The Academy expects the results of its CME program to be an improvement in competence or performance. Definitions: “Competence” refers to knowing how to do something; and “Performance” is what a psychiatrist would do in practice if given the opportunity.
Target Audience: Those interested in the recent developments and clinical application of psychodynamic approaches; a) psychoanalysts, psychiatrists, child and adolescent psychiatrists, other physicians, residents, fellows and medical students; b) psychologists, interns and students of psychology; c) social workers, students of social work; d) allied professionals and students. The American Academy of Psychodynamic Psychiatry and Psychoanalysis is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Academy of Psychodynamic Psychiatry and Psychoanalysis designates this live activity for a maximum of 24.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The American Academy of Psychodynamic Psychiatry and Psychoanalysis acknowledges the generous support of the Alexandra and Martin Symonds Foundation to its educational programs.

THURSDAY, MAY 3, 2018
7:00 PM
REGISTRATION
New York Ballroom West Foyer – Third Floor

7:30 PM - 9:00 PM
OPENING SESSION
New York Ballroom West – Third Floor

Welcome: Xavier F. Jiménez MD (Cleveland, OH)
Introductory Remarks: Jennifer I. Downey MD (New York, NY)
Introductory Remarks: Joanna E. Chambers MD (Indianapolis, IN)
Introduction: César Alfonso MD (New York, NY)
Presenter: Helen Herrman MD MBBS * (Victoria, Australia)
Presentation: PSYCHIATRISTS AS PARTNERS FOR CHANGE IN GLOBAL MENTAL HEALTH
Introduction: Silvia W. Olarte MD (New York, NY)
Presenter: Altha J. Stewart MD * (Memphis, TN)
Presentation: CHILDHOOD TRAUMA: A CHALLENGE TO GLOBAL MENTAL HEALTH
Discussion: Discussion with Academy Members and Presenters
Moderators: Xavier F. Jiménez MD (Cleveland, OH) César Alfonso MD (New York, NY)

9:00 PM – 10:00 PM
OPENING NIGHT RECEPTION (cash bar)
New York Ballroom East – Third Floor

FRIDAY, MAY 4, 2018
8:00 AM – 9:25 AM
Empire Ballroom East – Second Floor

SYMPOSIUM I: MENDING THE PSYCHIATRY—MEDICINE DIVIDE: TOWARDS BIOPSYCHOSOCIAL INTEGRATED CARE
Chair: Aila Landa PhD * (New York, NY)
Discussant: Philip R. Muskin MD (New York, NY)
Presenters: Aila Landa PhD * (New York, NY) INTEGRATED CARE APPROACHES FOR SOMATIC SYMPTOM DISORDERS
Jennifer A. Niels MD (Fairfield, CT) WHERE BODY MEETS MIND: COMPLEXITIES IN LATE STAGE LYME DISEASE
Maureen O’Reilly Landry PhD * (New York, NY) PSYCHOLOGICAL TRAUMA IN MODERN MEDICAL SETTING
SYMPOSIA I: HOW PSYCHOANALYSIS CAN CONTRIBUTE TO PSYCHIATRIC TREATMENT: A WPA-PIP AND WADP SYMPOSIUM

Chair: Michel Botbol MD * (Bohars, France)
Discussant: Ailan Tasman MD (Louisville, KY)
Presenters:
Maria Ammon PhD * (Berlin, Germany)
DYNAMIC PSYCHIATRY: AN INTEGRATIVE THEORETICAL CONCEPT AND PRACTICAL MULTIDICIPILINARY TREATMENT
Hervé Granier MD * (Montpellier, France)
The Internal Path
Michel Botbol MD * (Bohars, France)
The Role of Empathy in Psychotherapy Through the Psychiatric Institutional Context
Thomas Biehler PhD * (Munich, Germany)
Group Dynamics of Mirroring Between Staff and Patients

9:30 AM – 10:55 AM
Empire Ballroom East – Second Floor

SYMPOSIA II: THE PSYCHODYNAMIC KEYS TO UNLOCKING CHRONIC PAIN

Chair and Discussant: Xavier F. Jiménez MD (Cleveland, OH)
Presenters:
Sara Davin PsyD MPH * (Cleveland, OH)
As the Story Unfolds: Chronic Pain as the Narrative Expression of the Traumatic Xperience
Sarah Rispinto PhD * (Cleveland, OH)
Pain as Interpersonal Currency: Object Relations, Needs and Resultant Attachments
Darcy Mandell PhD * (Cleveland, OH)
Two’s Company, Three’s a Crowd (And Ten’s a Family): Group Therapy Dynamics in Chronic Pain

9:30 AM – 10:55 AM
Empire Ballroom West – Second Floor

PAPER SESSION I: DISSOCIATION, TRAUMA AND CHRONIFICATION

Chair: Ahron Friedberg MD (New York, NY)
Discussant: Sharon Batista MD (New York, NY)
Presenters:
Katerina Duchonova MD *
(Prague, Czech Republic)
Psychodynamic Understanding of Distress in Psychosis and Dissociation
Joanne Emmens MD *
(Auckland, New Zealand)
Uncloaking Priceless Pieces of Evidence: Understanding Intergenerational Transmission of Trauma
Reimer Hinrichs MD (Berlin, Germany)
Chronification-Nightmare of the Therapist and Weapon of the Patient

11:00 AM – 12:25 PM
Empire Ballroom East – Second Floor

PAPER SESSION II: PSYCHODYNAMIC PSYCHIATRY AND THE MEDICALLY ILL

Chair: Henry E. Weisman MD * (El Paso, TX)
Discussant: Richard C. Friedman MD (New York, NY)
Presenters:
Presenters: Xavier F. Jiménez MD (Cleveland, OH)  
PARALLEL PAINS AND DYNAMIC DILEMMAS: EXAMINING SUBTEXTS AND ENACTMENTS IN THE CARE OF PATIENTS WITH CHRONIC PAIN  
Juan Raul Condemarin MD (Boston, MA)  
PAIN, DEPRESSION AND INFLAMMATION: WHAT IS THE RELATIONSHIP BETWEEN THEM?  
Karen Hurley PhD* (Cleveland, OH)  
CARVING OUT SAFETY: CORE PAINS INFLUENCING DECISIONS ABOUT BILATERAL RISK-REDUCING MASTECTOMY IN WOMEN WITH BRCA 1/2 MUTATIONS

11:00 AM – 12:25 PM  
Empire Ballroom west – Second Floor  

PAPER SESSION III: PSYCHODYNAMIC PSYCHIATRY AND COMPLEX COMORbidITIES  
Chair: Joan G. Tolchin MD (New York, NY)  
Discussant: Richard M. Brockman MD (New York, NY)  
Presenters: Joanna E. Chambers MD (Indianapolis, IN)  
NEONATAL ABSTINENCE SYNDROME: THE INTERGENERATIONAL OPIATE EPIDEMIC EXPLAINED AND TREATED THROUGH ATTACHMENT  
W. Scott Griffies MD (Raleigh, NC)  
NEUROPSYCHODYNAMIC FORMULATIONS OF PSYCHOSOMATIC DISORDERS  
Daniela Polese MD (Rome, Italy)  
OVERCOMING THE MIND-BODY: A CLINICAL CASE OF DEPRESSION WITH OBSESSIVE SYMPTOMS AND COMORBID MYELODYSPLASIA

12:30 PM – 1:25 PM  
Empire Ballroom West – Second Floor  

WORKSHOP I: HOW TO SURVIVE IN A CHALLENGING HEALTH CARE WORLD: A LEGAL ROADMAP  
Moderators: Eugene L. Lowenkopf MD (New York, NY)  
Abe M. Rychik Esq * (New York, NY)

12:30 PM – 1:25 PM  
Empire Ballroom East – Second Floor  

WORKSHOP II: INTERPRETING THE ART OF THE MENTALLY ILL  
Moderators: Eugenio M. Rothe MD (Key Biscayne, FL)  
Daniel Castellanos MD* (Miami, FL)

1:30 PM – 2:25 PM  
Empire Ballroom East – Second Floor  

PLENARY SESSION: CREATING HEALTH CARE ENVIRONMENTS TO MEET THE NEEDS OF PATIENTS, PHYSICIANS AND THEIR COMMUNITIES  
Chair: Asher Aladjem MD (Paterson, NJ)  
Presenter: Mary Ann Cohen MD (New York, NY)

2:30 PM – 3:25 PM  
Empire Ballroom East – Second Floor  

WORKSHOP III: CHRONIC PAIN MANAGEMENT IN PATIENTS WITH CROHN’S DISEASE AND CENTRAL POST-STROKE PAIN  
Moderators: Mary Ann Cohen MD (New York, NY)  
Ralph N. Wharton MD (New York, NY)

2:30 PM – 3:25 PM  
Empire Ballroom West – Second Floor  

WORKSHOP IV: OUT OF THE OVERFLOW OF DELIRIUM THE HEART SPEAKS: PSYCHODYNAMICS OF BEDSIDE INTERVENTIONS AND POST-HOSPITALIZATION CARE
3:30 PM – 4:55 PM
Empire Ballroom East – Second Floor

SYMPOSIUM IV: PSYCHOSOMATICs AND PSYCHODYNAmIC PSYCHiATRY: A WPA-PIP AND WADP SYMPOSIUM

Chair and Discussant: Maria Ammon PhD * (Berlin, Germany)

Presenters:
- Sieglinde Bant MD * (Berlin, Germany)
  GENERAL PSYCHOSOMATIC MEDICINE OR THE LOSS OF THE CORE OF BEING
- Sylvia Melamedoff MD PhD * (Buenos Aires, Argentina)
  EXPERIENCES OF INFERTILITY AND POST-TRAUMATIC STRESS DISORDER: SOME PSYCHOANALYTIC CONSIDERATIONS
- Maurice Corcos MD * (Paris, France)
  PSYCHOSOMATIC AND PSYCHODYNAMIC PERSPECTIVE IN EATING DISORDERS
- Juan E. Mezzich MD PhD * (New York, NY)
  A PERSON-CENTERED PERSPECTIVE IN PSYCHOSOMATIC MEDICINE

3:30 PM – 4:55 PM
Empire Ballroom West – Second Floor

SYMPOSIUM V: DISRUPTIVE CHILDREN AND CHAOTIC FAMILIES: MULTIMODAL TREATMENT APPROACHES (PSYCHODYNAMIC, BEHAVIORAL AND FAMILY) IN CHILD AND ADOLESCENT PSYCHIATRY

Chair: Clarice J. Kestenbaum MD (New York, NY)
Discussant: Jo Hariton PhD * (White Plains, NY)

Presenters:
- Nitasha Shetty MD (New York, NY)
  YOU CAN GO HOME AGAIN: A TEENAGE, DRUG-ADDICTED MOTHER CONNECTS WITH HER ADOLESCENT DAUGHTER
- Jessica Eisenberg MD (New York, NY)
  DIVORCE, SUBURBAN STYLE: THE EFFECTS OF PARENTAL DISCORD ON A PRETEEN BOY
- Marta Galecky MD * (Brooklyn, NY)
  FAMILY TURMOIL AND THE EFFECTS ON AN ADOLESCENT BOY IN CONFLICT WITH HIS FATHER

5:00 PM – 5:55 PM
Empire Ballroom East – Second Floor

PLENARY SESSION: THE GOLDMAN RULE: ETHICAL CONSIDERATIONS

Introduction: César A. Alfonso MD (New York, NY)
Presenter: Richard C. Friedman MD. (New York, NY)

5:00 PM - 5:55 PM
Empire Ballroom West – Second Floor

COMMITTEE FOR THE ADVANCEMENT OF PSYCHOANALYSIS PLANNING SESSION

6:00 PM – 7:30 PM
Empire Ballroom East – Second Floor

KEYNOTE ADDRESS

Chair: Xavier F. Jiménez MD (Cleveland, OH)
Keynote Speaker: Mark Sullivan, MD PhD * (Seattle, WA)
Presentation: BETWEEN SUFFERING AND SURVIVAL: UNDERSTANDING THE DYNAMIC LINKS AMONG PHYSICAL PAIN, SOCIAL PAIN AND ADDICTION
SYMPOSIUM VI: PSYCHO_DYNAMIC PSYCHIATRY TRAINING
CHALLENGES IN UNDERSERVED AREAS OF THE WORLD

Chair: César Alfonso MD (New York, NY)
Co-Discussants: Marco C. Michael MD (New York, NY)
              César Alfonso MD (New York, NY)

Presenters: Hazli Zakaria MD * (Kuala Lumpur, Malaysia)
            Teaching Combined Psychotherapy Modalities to Residents in Malaysia

Sylvia Detri Eivira MD (Kebayoran Baru, Indonesia)
Petrin Redayani Lukman MD* (Jakarta, Indonesia)

SPEAKER OBJECTIVES

Aida Syanariz Adlan, MBBS MPM (see César A. Alfonso, MD - Symposium VI)

Asher Aladjem, MD (see Mary Ann Cohen MD – Plenary Session)

César A. Alfonso, MD (see Richard C. Friedman MD - Plenary Session)

César A. Alfonso, M.D. (see Douglas H. Ingram MD - Plenary Session)

César A. Alfonso, MD (Symposium VI)
By attending this presentation, participants will have the opportunity to improve competence and performance in psychodynamic psychiatry, and in training and supervision of psychotherapy education in underserved areas, nationally and internationally.

Maria Ammon, MD (Symposium II - see Michel Botbol, MD)

Maria Ammon, MD (Symposium IV)
By attending this presentation, participants will have the opportunity to improve competence or performance in understanding the clinical interphase between psychodynamic psychiatry and psychosomatics, including in the care of persons who have eating disorders, infertility, and medical multimorbidities.

Sieglinde Bast MD (see Maria Ammon, PhD – Symposium IV)

Gail W. Berry MD
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) understanding the contributions to psychoanalysis of Robert Waelder and (2) discussing the multiple dimensions of humor in clinical and nonclinical settings

Thomas Bihler, MD (see Michel Botbol, MD - Symposium II)

Michael Blumenfield, MD (see Douglas H. Ingram, MD - Plenary Session)

Michel Botbol, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in attending to vulnerable adolescents in institutional contexts such as day hospitals, long term in patient units, foster homes or educative services.

Richard M. Brockman MD (see Joan Tolchin MD)

Daniel Castellanos, MD (see Eugenio M. Rothe, MD - Workshop II)

Joanna E. Chambers, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) understanding how the current opiate epidemic is affecting the next generation; (2) recognizing the diagnosis and prognosis of Neonatal Abstinence Syndrome (NAS); (3) understanding the neurobiology of addiction and the neurobiology of attachment; (4) recognizing that childbirth may represent a ‘sensitive attachment period’ for both the newborn infant and in the mother; (5) recognizing that addiction can develop as a result of poor attachment; and (6) understanding how attachment is a necessary component in the treatment of addictions in the mother and infant.
Viviana I. Chiappetta, MD (see Scott C. Schwartz MD)

Mary Ann Cohen, MD (Plenary Session)
By attending this presentation, psychodynamic psychiatrists, physicians and other mental health professionals will have the opportunity to improve competence and performance by applying the biopsychosocial model when creating and implementing collaborative models of care for patients with complex multimorbidities.

Mary Ann Cohen, MD (Workshop III)
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) the development of therapeutic alliances; (2) transference and countertransference; (3) handling of challenging situations; (4) practical applications of psychoanalytic theories; and (4) learning complex pathologies, neuroscientific advances, pharmacological treatments and their implications for psychotherapy.

Juan Raul Condemarin, MD (Paper Session II)
By attending this presentation, participants will have the opportunity to improve competence or performance in treatment of pain, inflammation and depression.

Juan Raul Condemarin, MD (see Joseph Silvio MD Workshop VI)

Maurice Corcos, MD (see Maria Ammon PhD - Symposium IV)

Sara Davin, PsyD MPH (see Xavier F. Jiménez, MD – Symposium III)

Eugene Della Badia DO (see Gail Berry MD, Paper Session VI)

Anna L. Dickerman, MD (See Daniel Linhares MD - Paper Session IV)

Jennifer I. Downey, MD (Presidential Address)
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) consideration of the historical basis for the formation of the two psychoanalytic organizations; (2) understanding the difference in how the two organizations evolved; and (3) consideration of how the combined organization can work to further modern approaches to mental health needs of patients and support training in psychodynamically informed therapy in residency programs. The special issue of psychoanalytic institutes will be addressed.

Katerina Duchonova, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in understanding the distress of psychosis and dissociation in persons with personality disorder from a psychodynamic perspective.

Marianne H. Eckhardt, MD (see Douglas H. Ingram, MD - Plenary Session)

Jessica Eisenberg, MD (see Clarice J. Kestenbaum, MD - Symposium V)

Sara Davin PsyD MPH (see Xavier Jimenez MD – Symposium III)

Sylvia Detri Elvira, MD (see César A. Alfonso, MD - Symposium VI)

Joanne Emmens MD
By attending this presentation, participants will have the opportunity to improve competence or performance by (1) understanding the importance of psychoanalytic theory in holding open space for expansive thinking when working with the complexities of severe psychopathology; (2) understanding of psychoanalytic theory with an emphasis on the theories of Freud, Bion and Klein; and (3) demonstrating the place of psychoanalytic theory in holding practitioners in their work, providing important immunity to overwhelm and burnout.
Sepideh Faez, MD (see Scott C. Schwartz MD)

Ahmed Fayed, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in the care of patients with psychosomatic presentations.

David V. Forrest, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in consideration of the wider relevance of anthroposocial narratives drawn employing psychodynamic methods from nonpatient subjects, to characterize commonalities within groups.

Ahron Friedberg, MD
By attending this presentation, participants will have the opportunity to improve competence and performance by understanding the psychodynamics of how traumatic life experiences lead to dissociation and chronification.

Richard C. Friedman, MD (see Henry E. Weisman - Paper Session II)

Richard C. Friedman, MD (Plenary Session)
By attending this presentation, participants will have the opportunity to improve competence and performance understanding the current APA ethical guidelines concerning the Goldwater Rule and discuss revisions or modifications.

Marta Galecky, MD (see Clarice J. Kestenbaum, MD - Symposium V)

Andrew J. Gerber, MD (see John S. Tamerin MD - Panel)

Myron L. Glucksman, MD (see Douglas H. Ingram, MD - Plenary Session)

Hervé Granier, MD (see Michel Botbol, MD - Symposium II)

W. Scott Griffies, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) presenting of psychodynamic features of psychosomatic patients; (2) giving a neuro-psychodynamic explanation for stress and mind-body dysregulation in psychosomatic patients; and (3) describing the function of the amygdala and basal ganglia in the development of the body as a core means of implicit procedural regulation of stress and arousal in psychosomatic patients.

Jo Hariton PhD (see Clarice Kestenbaum - Symposium V)

Sheila Hafter Gray, MD (see Douglas H. Ingram, MD - Plenary Session)

Angela Hegarty, MB BCH (see Charmaine Rapaport MD)

Helen Herrman, MD MBBS
By attending this presentation, participants will have an opportunity to improve competence by (1) understanding what are the critical gaps in the delivery of mental health services globally and in particular that of populations at risk or in underserved areas and (2) gaining competence will improve performance for designing more effective and efficient collaborative health care delivery strategies for psychotherapy services and other integrated psychosocial treatments.
Reimer Hinrichs, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in preventing and dealing with chronicization.

Jaime Hosticka
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) the conceptualization, or re-conceptualization, of: chronic pain in the psychodynamic life of a suferer; (2) the contours of countertransference; and (3) nascent narratives about pain and archetypes.

Karen Hurley, PhD
By attending this presentation, participants will have the opportunity to improve competence or performance in providing consultation and psychotherapy to patients who are deciding about cancer risk-reducing surgeries by addressing psychodynamic issues that may be influencing their decisions.

Douglas H. Ingram, MD (Plenary Session)
By attending this presentation, participants will have the opportunity to improve competence in performing psychodynamic psychiatry by appreciating 1) the impact of likely developments in technology, 2) the transgender concerns among adolescents, 3) developmental issues in maturity, 4) the conflicts and turmoil encountered by the spouses of dementia patients, 5) the challenge of retirement among psychiatrists, 6) the stalking of psychologists, 7) strategic planning in promoting psychodynamic training among residents, 8) the ways in which training in child and adolescent psychiatry programs have shifted, 9) the concept of intermittent psychotherapy, and 10) the views that non-psychiatric physicians hold of psychiatrists.

Xavier F. Jiménez, MD (Symposium III)
By attending this presentation, participants will have the opportunity to improve competence or performance in psychodynamic understanding and treatment of chronic physical pain.

Xavier F. Jiménez, MD (Paper Session II)
By attending this presentation, participants will have the opportunity to improve competence or performance in managing subtest in chronic physical pain.

Rasmon Kalayasiri, MD (see César A. Alfonso, MD - Symposium VI)

Sherry P. Katz-Bearnot, MD (Residents Luncheon and Lecture)
By attending this presentation, participants will have the opportunity to improve competence in understanding distressing countertransferences that occur when treatments that fail patients. Participants will improve performance formulating accurate differential diagnosis and implementing treatment strategies that are psychodynamically informed.

Sherry P. Katz-Bearnot, MD (see Douglas H. Ingram MD)

Sherry P. Katz-Bearnot, MD (see Alla Landa PhD - Symposium VI)

Clarice J. Kestenbaum, MD (see Douglas Ingram MD Plenary Session)

Clarice J. Kestenbaum, MD (Symposium V)
By attending this presentation, participants will have the opportunity to improve competence or performance in combined psychodynamic, behavioral, and family therapy.
Clarice J. Kestenbaum, MD (Symposium VII)
By attending this presentation, participants will have the opportunity to improve competence or performance in

Katy Lalone, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in employing a psychodynamic framework for identifying a medically ill patient’s angst and developing targeted interventions in the acute and post-acute setting.

Alia Landa, PhD (Symposium I)
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) awareness of complexities in treating patients with chronic bodily symptoms and those undergoing medical procedures, as well as ways to address them in an effective treatment; (2) implementing collaborative/integrative care approaches to treating patients with chronic bodily symptoms; (3) treating patients with complex combination of somatic symptoms and psychological distress; and (4) facilitating multidisciplinary team treatments for patients with complex body-brain symptomatology.

Alia Landa, PhD (Symposium VII)
By attending this presentation, participants will have an opportunity to improve competence in (1) recognizing the role of early development and early interpersonal environment is the origin of somatic symptomatology; (2) treating patients with somatic symptom disorders; and (3) facilitating psychotherapeutic treatment for somatic symptom disorder patients by utilizing research findings from developmental neuroscience.

Katy LaLone MD (see Joseph J. Rasimas)

Daniel F. Linhares MD – Paper Session IV - By attending this presentation, participants will have an opportunity to improve competence in understanding the psychodynamic factors relevant to the care of persons with chronic pain syndromes

David L. Lopez, MD (see John Tamerin Panel I)

David L. Lopez, MD (Plenary Session – see Douglas H. Ingram MD)

Eugene L. Lowenkopf, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) understanding the legal issues of employment and effectively negotiating a contract; (2) recognizing malpractice issues in team practices and in various management structures; (3) developing a clear appreciation of the physician’s responsibilities and limitations; and (4) practicing defensively and avoiding legal liability.

Petrin Redayani Lukman, MD (see César A. Alfonso – Symposium VI)

Gregory C. Mahr, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in the treatment and understanding of somatic symptom and other somatoform disorders.

Darcy Mandell, PhD (see Xavier F. Jiménez, MD – Symposium III)

Sylvia Melamedoff, PhD (see Maria Ammon PhD – Symposium IV)
Marco C. Michael MD (see César A. Alfonso, MD – Symposium VI)

Juan Mezzich, MD PhD (see Maria Ammon PhD – Symposium IV)

David L. Mintz, MD (See Joseph Silvio MD - Workshop VI)

Philip R. Muskin MD (see Alia Landa PhD Symposium I)

Michael F. Myers, MD (see John Tamerin - Panel)

Jennifer A. Nields, MD (see Alia Landa, PhD – Symposium I)

Silvia W. Olarte, MD (Workshop V – see Eva Szigethy, MD)

Silvia W. Olarte, MD (See Scott Schwartz MD Panel II)

Silvia W. Olarte, MD (Plenary Session – see Douglas H. Ingram MD)

Maureen O’Reilly Landry, PhD (see Alia Landa, PhD - Symposium I)

Gerald P. Perman MD (see Charmaine Rapaport MD)

Daniela Polese, MD
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) psychosomatic psychiatry and (2) psychodynamic psychotherapy on patients with psychological symptoms and medical illness.

Charmaine Rapaport MD
By attending this presentation, participants will have the opportunity to improve competence or performance in the care of patients with traumatic grief, taking into account potentially incapacitating countertransference issues.

Joseph J. Rasimas, MD PhD
By attending this presentation, participants will have the opportunity to improve competence or performance in employing a psychodynamic framework for identifying a medically ill patient's angst and developing targeted interventions in the acute and post-acute setting.

Petrin Redayani Lukman MD (see César A. Alfonso, MD – Symposium VI)

Paulina Riess, MD (see Scott C. Schwartz MD)

Sarah Rispinto, PhD (see Xavier F. Jiménez, MD – Symposium III)

Shapir Rosenberg, MD
By attending this presentation, participants will have an opportunity to improve competence in (1) applying strong therapeutic alliance principles to achieve positive outcomes; (2) handling challenging patient, family, and provider dynamics including in the bereavement setting; and (3) recognizing complex countertransference situations.

Eugenio M. Rothe, MD (Workshop II)
By attending this presentation, participants will have the opportunity to improve competence or performance in (1) learning about the relationship between creativity and mental illness; (2) learning how creativity can serve as a mature defense mechanism in the mode of sublimation to deal with internal conflict, improve self-esteem and accomplish mastery over drives; (3) learning about utilizing the patient's art as a vehicle to strengthen the therapeutic alliance and better understand the patient's internal world; and (4) learning how to utilize patient art to teach psychiatry to residents and medical students.
Eugenia M. Rothe, MD (See John Tamerin Panel I)

Abe M. Rychik, Esq. (see Eugene L. Lowenkopf, MD)

Seema Sannesey MD (see Scott C. Schwartz MD)

Scott C. Schwartz, MD
By attending this presentation, participants will have an opportunity to improve competence in understanding the underlying subtleties of the therapeutic alliance with particular attention to countertransference processes.

Faisal S. Shaikh, FRC Psych
By attending this presentation, participants will have an opportunity to improve competence in psychodynamics applied to a personal tragedy involving a long-term missing relative.

Nitasha Shetty, MD (see Clarice J. Kestenbaum, MD - Symposium V)

Ann-Louise S. Silver, MD (see Douglas H. Ingram, MD)

Joseph R. Silvio, MD (Workshop VI)
By attending this presentation, participants will have an opportunity to improve competence and performance in integrating the practice of psychodynamic psychotherapy and psychopharmacology in the clinical care of patients with complex illnesses

Altha J. Stewart, MD
By attending this presentation, participants will have an opportunity to improve competence by (1) identifying the prevalence of childhood trauma and its impact in the development of adult psychopathology and (2) improvement in competence will improve performance when conducting psychotherapy with adults who experienced adverse childhood life events.

Mark Sullivan, MD
By attending this presentation, participants will have an opportunity to improve competence by understanding the psychodynamic links among physical pain, social pain and addiction. Improving competence will lead to improved performance by developing informed clinical skills in the care of persons with chronic pain and complex medical disorders.

Regina Sullivan, PhD (see Aila Landa PhD)

Jamie Sweigart, DO (see Gregory C. Mahr MD)

Eva M. Szegedy, MD PhD
By attending this presentation, participants will have an opportunity to improve competence by understanding the physiopathological relationship of physical pain and emotional pain and recognizing the usefulness of combined psychodynamic treatment and regressive hypnosis in patients suffering from physical and emotional pain.

John S. Tamerin, MD
By attending this presentation, participants will have an opportunity to improve competence in understanding the relevance of psychodynamic thinking when caring for patients with mood disorders and improve performance with implementation of comprehensive and integrated treatment plans that take into account biopsychosocial, cultural and psychodynamic factors.
Allan Tasman MD (see Michel Botbol MD Symposium II)

Joan G. Tolchin MD (Paper Session III)
By attending this presentation, participants will have an opportunity to improve competence and performance by elucidating how principles of attachment theory and neuropsychodynamic formulations can inform the care of patients with complex comorbidities

Joan G. Tolchin MD (Plenary Session – see Douglas H. Ingram, MD)

Matthew A. Tolchin MD (Plenary Session – see Douglas H. Ingram, MD)

Ronald N. Turco, MD (Paper Session VI)
By attending this presentation, participants will have an opportunity to improve competence in working with complex psychoanalytic problems and supervision of residents.

Ronald N. Turco, MD (Plenary Session – see Douglas H. Ingram, MD)

Ethan Weibman (see John S. Tamerin, MD)

Henry W. Weisman, MD (Paper Session II) - By attending this presentation, participants will have an opportunity to improve competence and performance by understanding the biopsychosocial factors related to the care of patients with chronic pain, depressive disorders and of persons undergoing elective surgical procedures based on genetic cancer risk.

Ralph N. Wharton, MD
By attending this presentation, participants will have an opportunity to improve competence in vicissitudes of long-term (10-50 years) psychiatric care.

Hazii Zakaria, MD (see César A. Alfonso, MD - Symposium VI)
