Psychodynamics:  
*Essential to the Issue of Suicide and Other Challenges to Modern Day Psychiatry*

May 16-18, 2013  
San Francisco, CA

**Program Chair:** Mary Ann Cohen, M.D.  
**CME Committee Chair:** Silvia Olarte, M.D.  
**Chair of the Scientific Program Committee:** Eugenio M. Rothe, M.D.

**Conference Learning Objectives:**  
This meeting has been designated to meet the following professional practice gaps and the needs derived from those gaps:  

**Gap #1:** Improving treatment of patients by:  
A. Attaining sufficient knowledge of psychodynamic principles and the ability to apply this knowledge.  
B. Enhancing the ability to integrate dynamic principles, psychopharmacology, and neuroscience in clinical practice.

**Needs derived from the gaps above:**  
A. To learn about development of therapeutic alliances; transference and countertransference; the handling of challenging situations; and practical applications of psychoanalytic theories.  
B. To learn about complex pathologies, neuroscientific advances, pharmacological treatments, and medical conditions and their implications/ramifications for psychodynamic psychotherapy.

**Gap #2:** Enhancing training of residents and early career psychiatrists  

**Needs derived from this gap:**  
A. To learn new ways of engaging residents and training them in the complex theories and techniques of psychodynamic psychotherapy.  
B. To foster learning of complex theories and techniques of psychodynamic psychotherapy by early career psychiatrists.

All presentations must address at least one of the specified needs.

The Academy expects the results of its CME program to be improvement in competence or performance. Definitions: “Competence” refers to knowing how to do something. “Performance” is what a psychiatrist would do in practice if given the opportunity.

**Target Audience:** Psychiatrists, psychoanalysts, psychodynamic psychiatrists, psychosomatic medicine psychiatrists, psychologists, social workers, early career psychiatrists, trainees, residents, and students.

The American Academy of Psychoanalysis and Dynamic Psychiatry is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Academy of Psychoanalysis and Dynamic Psychiatry designates this live activity for a maximum of 20.5 *AMA PRA Category 1 Credits*™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The American Academy of Psychoanalysis and Dynamic Psychiatry acknowledges the generous support of the Alexandra and Martin Symonds Foundation to its educational programs.
A Message from the Program Chair  
Mary Ann Cohen, M.D.

The 2013 Annual Meeting program is both exciting and relevant to your practice of psychodynamic psychotherapy. This year’s theme emphasizes the significance of psychodynamic psychiatry in meeting the some of today’s most complex challenges. With suicide as paradigm, the program will cover topics that include the nature of psychodynamics, analytic psychology, psychodynamics of suicide and its aftermath, physician-assisted suicide, and combat-related trauma and its consequences. We will explore these challenges from biopsychosocial and cultural perspectives consistent with the mission of the Academy. We invite you to join us at the 2013 AAPDP Annual Meeting in the beautiful city of San Francisco.

Modern day psychiatry and medicine are under siege from disturbing internal and external pressures for productivity, efficiency, and cost containment. Some of these pressures result in less time for patients, defensive medicine, fragmentation of care, and dissatisfaction on the part of both physician and patient. Psychiatrists, psychodynamic psychiatrists, and their patients may be most exquisitely vulnerable to these pressures. Clinical challenges are magnified and care of patients compromised as productivity pressures mount. Suicide and other self-destructive behaviors are among the greatest challenges we face. In this meeting we will describe the nature of psychodynamic psychiatry using suicide as a paradigm. Our program is relevant for psychoanalysts, psychodynamic psychiatrists, child and adolescent psychiatrists, psychosomatic medicine psychiatrists as well as general psychiatrists, and trainees.

Our goal is to demonstrate the salience of psychodynamic psychiatry in the evaluation and care of patients, in maximizing life potentials, and in the prevention of suicide and other self-destructive behaviors. We explore the impact of pressures for productivity on countertransference and clinician satisfaction as well as patient satisfaction. Through film, symposia, workshops, and an emphasis on interactive participation of attendees we provide a reference frame for understanding psychodynamics as an essential component of modern day education and practice of psychiatry and medicine.

This year, thanks to the work of our 2013 Annual Meeting Program Committee and in conjunction with AAPDP President, Dr. Michael Blumenfield, CME Committee Chair, Dr. Silvia...
Olarte, and Scientific Program Committee Chair, Dr. Eugenio Rothe our topic is an exciting one and our three plenary speakers are internationally known award-winning psychiatrists. Our Opening Night Speaker, Mardi Horowitz, M.D., Distinguished Professor of Psychiatry at University of California San Francisco, has written 20 professional books and over 280 scientific articles in the fields of PTSD, stress, personality, and psychodynamic psychotherapy. His outstanding presentation, Grieving as well as Possible, will begin our program.

Our Keynote Speaker, Dilip Jeste, M.D., is President of the American Psychiatric Association. Dr. Jeste is the Estelle and Edgar Levi Chair in Aging, Director of the Sam and Rose Stein Institute for Research on Aging, and Distinguished Professor of Psychiatry and Neurosciences at the University of California, San Diego, and at the Department of Veterans Affairs San Diego Healthcare System. Dr. Jeste will present some of his ideas on the unique relationship between wisdom and aging in his keynote address on Wisdom: From Psychology to Neuroscience.

The Presidential Address will be presented by Herbert Pardes, M.D., former President of the American Psychiatric Association. He is Executive Vice Chairman of the Board of New York-Presbyterian Hospital and New York-Presbyterian Healthcare System and served as Director of the National Institute of Mental Health (NIMH) and U.S. Assistant Surgeon General during the Carter and Reagan administrations. Dr. Pardes was also appointed to serve on commissions related to health policy by Presidents George W. Bush and Bill Clinton, including the Presidential Advisory Commission on Consumer Protection and Quality in the Healthcare Industry and the Commission on Systemic Interoperability. Dr. Pardes will present his thoughtful work on health care policy in his address on Psychodynamics in a Turbulent World of Health Reform.

The meeting theme and program are consistent with the mission of the Academy “To provide a forum for the expression of ideas, concepts, and research in psychodynamic psychiatry and psychoanalysis” and “To constitute a forum for expression of and inquiry into the phenomena of individual motivation and social behavior.” It is also a great opportunity to network and collaborate with our colleagues, to reunite with old friends, and to meet new ones. To that end, we are planning to bring back the traditions of a cocktail party on Thursday night and a welcome reception on Friday night of the meeting as well as other chances to get together in the warm and welcoming atmosphere of our meeting. We will continue the tradition of the Award Dinner on Saturday night.

Our 2013 Annual Meeting promises to be a wonderful educational experience, a chance to share your ideas and network with colleagues in a beautiful setting. I hope to see you in San Francisco in May!
