The Academy is where physician psychoanalysts and psychodynamic psychiatrists: discover a forum for exchange of ideas; find a voice within the APA to advocate for psychodynamic understanding in the evaluation and treatment of patients; take a leadership role in promoting the importance of psychodynamic training in residency and medical education.
Message from the Program Co-Chairs: Every single approach to Psychiatric treatment is based on the momentous discovery by Freud that all behavior is organized around a logical and comprehensible configuration of mental process. As a result, the work of Freud has been placed in the pivotal achievements of all science. Though aspects of his work have needed modification and reassessment, his theory remains central to all treatment. On the 75th anniversary of his death, an opportunity faces us to review and amplify his contributions. The treatment of mental illness has taken many forms and approaches, but always with the core belief in the fundamental logic of the psyche, and the ever-deepening value of the therapeutic alliance.

Program: Our goal is to assess and strengthen the work of the psychoanalytic pioneers and reiterate the significance of the therapeutic alliance even in the face of insurance, pharmaceutical, and media attacks on its value. The alienation, economic crises, dehumanization, and selfishness in our world underlie the need for a more sincere and thorough understanding of human nature, and a humanistic mode of treating psychopathology. We welcome papers and panels that elucidate this, regardless of the theoretical framework. The importance of passing such values to future generations of clinicians makes vital the need never to lose sight of Freud’s legacy and the dynamic work he began.

The American Academy of Psychoanalysis and Dynamic Psychiatry is an organization that works to translate the applicability of the concepts of psychoanalysis and psychodynamics into the fields of neurobiology, psychopharmacology, cross-cultural psychiatry, creativity, media and the arts, and other related disciplines. We are affiliated with the American Psychiatric Association.

Conference Learning Objectives: This meeting has been designated to meet the following professional practice gaps and the needs derived from those gaps:

Gap #1: Improving treatment of patients by:
A. Attaining sufficient knowledge of psychodynamic principles and the ability to apply this knowledge.
B. Enhancing the ability to integrate dynamic principles, psychopharmacology, and neuroscience in clinical practice.

Needs derived from the gaps above:
To learn about development of therapeutic alliances; transference and countertransference; the handling of challenging situations; and practical applications of psychoanalytic theories.
To learn about complex pathologies, neuroscientific advances, pharmacological treatments, and medical conditions and their implications/ramifications for psychodynamic psychotherapy.

Gap #2: Enhancing training of residents and early career psychiatrists

Needs derived from this gap:
A. To learn new ways of engaging residents and training them in the complex theories and techniques of psychodynamic psychotherapy.
B. To foster learning of complex theories and techniques of psychodynamic psychotherapy by early career psychiatrists.

All presentations must address at least one of the specified needs.

The Academy expects the results of its CME program to be improvement in competence or performance. Definitions: “Competence” refers to knowing how to do something; and “Performance” is what a psychiatrist would do in practice if given the opportunity.

**Target Audience:** Those interested in the recent developments and clinical application of psychodynamic approaches: a) psychoanalysts, psychiatrists, child and adolescent psychiatrists, other physicians, residents and fellows; b) psychologists, interns and students of psychology; c) social workers, students of social work; d) allied professionals and students.

The American Academy of Psychoanalysis and Dynamic Psychiatry is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Academy of Psychoanalysis and Dynamic Psychiatry designates this live activity for a maximum of 21.0 hours AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The American Academy of Psychoanalysis and Dynamic Psychiatry acknowledges the generous support of the Alexandra and Martin Symonds Foundation to its educational programs.
